Office of University Architects for Facilities Planning
UNIVERSITY OF GEORGIA

[ICONIC CAMPUS QUADS & COURTYARDS]

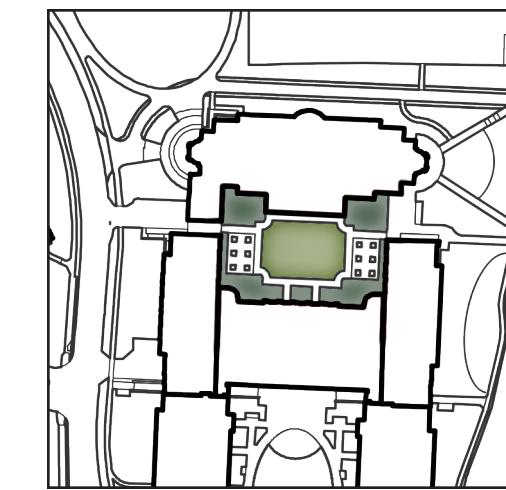

The University of Georgia's Physical Master Plan is grounded in guiding principles that hold campus green spaces in the highest esteem. Among them, *Extend the characteristics of North Campus, Develop a connected campus, Provide the optimal student environment, and Enhance Natural Resources* are complementary planning aims that intersect across the university's historic and contemporary landscapes. As the Office of University Architects **plans, designs, builds, and preserves** the University of Georgia, the scale and proportion of these iconic quads and courtyards are as instructive as the material and form of their adjacent architecture in guiding our work. Though not an exhaustive inventory of UGA's many memorable outdoor places, examples here from across Athens main campus are highlighted at 1"=200' (when printed full-size at 24"x36") with estimated dimensions and area to inform future work by reference. Light green areas are characterized primarily by sod ground cover while dark green areas are maintained with a mix of shrubs and/or trees.
